BDM 20

REFURBISHMENT

WE BUY

that is why we are always looking for used Hörauf BDM machines to refurbish. Do you want to sell your used equipment? If so, contact us!

WE REFURBISH

the machines in our workshop using only original Hörauf parts. All BDMs are carefully serviced, then checked and meticulously adjusted before they leave our workshop for resale.

WE SELL

and deliver our refurbished machines all over the world. If you like, we can also help you install the machine and provide training on site. Are you looking for a cost-effective, refurbished machine? If so, contact us!

WE SERVICE

equipment by providing general and specific maintenance on your premises or in our workshop. Do you want to keep your machines in excellent condition and safeguard your investment? If so, contact us!

MAINTENANCE SERVICE

ON SITE

Our technician comes to your premises and inspects your machine units. Based on his recommendations we establish a turnkey proposal, which we then discuss with you and adapt according to your requirements. Thanks to our many years of experience we know which machine components are subject to wear and tear and require the most attention. This type of maintenance not only guarantees trouble-free production but also allows you to maintain optimal machine value over an indefinite period.

CHECK & CLEAN

This service includes a complete check-up and cleaning of your machine, especially those parts that are most subject to wear and tear. We do all the necessary work and replacements so that your machine is once more in perfect working order. We suggest that this maintenance work is done on our premises in order to ensure optimal efficient service.

OVERHAUL

This service includes a complete overhaul of your machine. The machine is taken apart, cleaned and repainted. Each individual module of the machine is carefully checked and overhauled. Whenever possible, improvements and adjustments available from new series are implemented in order to enhance performance. Your machine is then in perfect working order again (with a three-month guarantee for mechanical parts). This overhaul can only be done on our premises.
